
JASON BATH SYSTEM CLEANER DIRECTIONS OF USE

The following are the recommended directions that are provided on our Jason Bath System Cleaner Bottle. This solution cleans the bath surface and the various parts of your bath system that you can't physically reach. Use at least once a month to keep your bath sparkling clean.

Whirlpool, MicroSilk® and MicroSilk®-Whirlpool Baths

Directions:

- 1) Close bath drain.
- 2) Fill bath with warm water to a level at least 2" (5cm) above the highest jet and 4" (10cm) above air inlet holes for AirMaseur® Baths.
- 3) Pour 16 ounces (entire container) into the bath water.
- 4) Turn on pump for 10 minutes.
- 5) Turn off pump and drain the bath.
- 6) To rinse, refill the bath with cold water, turn on pump for five minutes, then turn off pump and drain the bath. Your bath system is now clean!

Disinfection: To disinfect your bath, household bleach can be added to the bath water with this solution. For one person baths with capacities of up to 50 gallons (190 liters), add one cup (8 fluid ounces or 236 ml) of household bleach. For two-person baths with capacities greater than 50 gallons, add two cups (16 fluid ounces or 473 ml) of household bleach.

DO NOT APPLY full strength bleach or other chlorinated cleansers directly to metal bath trim or faucetry.

Caution: Avoid contact with eyes. In case of eye contact, flush with water for several minutes. If taken internally, drink plenty of water, induce vomiting, then see a physician.
