
Belina™ Bath Faucet and Deck Mounted Hand Shower

The Belina™ series of coordinated faucets and hand shower assemblies for the bathroom offer styling and quality that speaks for itself.

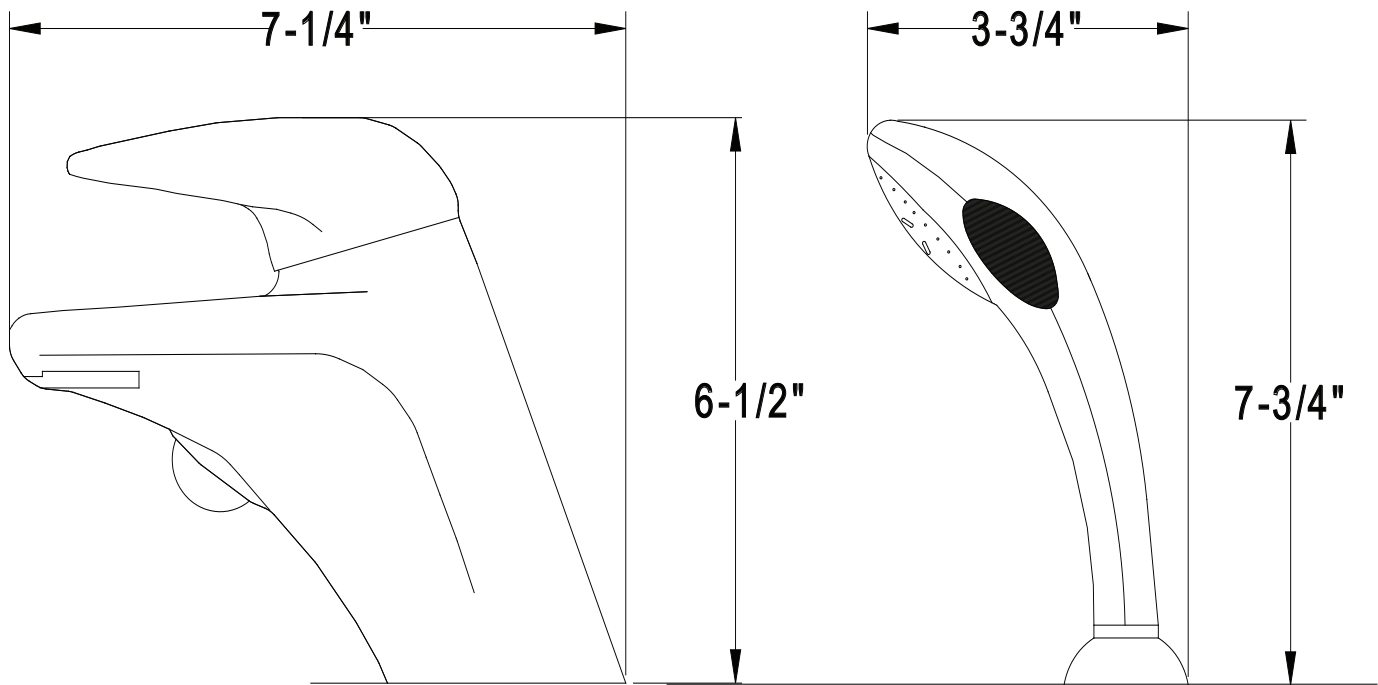

The Belina™ rapid-fill bath faucet is the embodiment of elegance. Water flow and temperature are adjusted by a single-lever control. It has an integrated diverter for the hand-shower located on the underside of the spout to eliminate the clutter of separate valves. It is cast in Solid Brass with a Polished Chrome finish. A quarter-turn ceramic cartridge controls flow, providing years of trouble-free (and drip-free) operation.

The Belina™ deck mounted hand shower has individually plated components and unique double-locking spiral hose, to assure the highest strength and most lasting finish. The Belina™ deck mounted hand shower is offered in Polished Chrome finish on grey.

Belina™ hand showers are also made to a higher quality standard. By applying pressure to the side buttons, you can adjust the flow from a gentle rain to a stimulating massage, or a combination of both.

Not recommended for all center drain baths and EL and CS series bath models.

Belina™ Bath Faucet and Deck Mount Hand Shower Set
