

# Designer Signature Edition Whirlpool Digital Control Keypad with Remote Control

## CONTROL SYSTEM

Jason's Signature Edition Whirlpool bath includes a 1½ HP, 3 speed pump (220v, 20A), an automatic 1.5 kw heater, an underwater mood light, a digital control system, and low water level and water temperature sensors. The control system includes a 20-minute timer to control the pump, plus keys to control the pump speeds, the mood light, and optional jetted neck pillow. The LCD display alternately indicates the water temperature and whirlpool time remaining.

### PUMP ON/OFF (PUMP ICON)

To control the operation of the Whirlpool pump motor, press and hold for each setting: High, Medium, Low, or Off. A 20 minute decreasing timer will be initiated when the pump motor starts. Press and release the Pump icon once to display the current pump setting. The Pump icon lights when the water is at operating level and the LCD displays "System Ready". The LCD will display "Pump Off", "Pump High", "Pump Medium", or "Pump Low" when the key is pressed. It also toggles between Temperature and Timer at 5 second intervals. "Low Water" is displayed for 5 seconds if no water is detected.

### JETTED NECK PILLOW ("P" ICON) (OPTIONAL)

To control the operation of the jetted neck pillow, press and hold for each setting, you can set for a constant flow on both jets, a pulsing flow on both jets, or a pulsing alternating flow between jets.

Press and release the Pillow icon once to display the current pillow setting. The Pillow icon will light whenever the pump is running. The solenoids will open for two (2) minutes to drain during the purge cycle countdown. The LCD will display "Pillow On", "Pillow Pulse1", "Pillow Pulse2", or "Pillow Off" while the key is pressed.

### LED LIGHT (LIGHT ICON)

Hold the key for less than two (2) seconds to turn the lights Off or On. Hold the key for more than two (2) seconds to change modes. The Light icon should remain lit as long as the bath is connected to a power supply. This function has a two (2) hour timer and remembers the last mode. The LCD displays "Light On" or "Light Off" while the key is pressed for less than two (2) seconds; "Light Cycle" is displayed if pressed for more than two (2) seconds.

### REMOTE CONTROL

The Signature Edition control system includes a waterproof floating Universal Remote Control. It controls all bath functions plus a TV, DVD, CD, etc. which can be heard through the Sound Immersion Transducers (optional).

### AUTOMATIC HEATER

The 1.5 kw heater included with the Signature Edition Whirlpool operates automatically whenever the bath is turned on. The heater will maintain the temperature of the bath water.

### Control with Temperature and Water Level Sensors, Mood Light, and Heater

#### STANDARD FEATURES

- Ergonomically placed control console with display to facilitate use by the bather.
- Chromotherapy: The system includes a mood light with fixed colors, pre-programmed lightshows, and bathside access for bulb replacement.
- 20-minute whirlpool system timer.
- LCD display alternately shows whirlpool time remaining and water temperature.
- Water level sensor prevents equipment from operating without the proper amount of water.
- Water temperature sensor displays the bath water temperature for the bather's convenience (+/- 5°F).
- The control system is completely factory assembled and tested on each Whirlpool bath.
- The control has diagnostics to help with Setup and Troubleshooting.
- The Signature Edition control system includes the Automatic Ozone System to protect the bath from bacteria, viruses, etc.

#### SPECIFICATIONS

- Pump/Motor Rating:** 1 1/2 Hp, 240v, 60Hz, 3-speed.
- Mood Light:** Multi-color LED mood light with bathside access is standard with all Signature Edition Whirlpools.
- Water Heater Rating:** 1.5 kw, 240v, 60Hz resistive heater load maximum temperature 104°.
- Electrical Service:** Dedicated service(s) protected by ground fault interrupter is required. 20 A, 240 v, 60 Hz
