

Jason Designer Whirlpool Jets

Flow Adjustable Directional Jet

Rotating & Flow Adjustable Jet

Flow Adjustable Foot Jet

All Jason Designer Whirlpool and Air-Whirlpool baths are constructed with color coordinated Perfect Pressure/Perfect Flow™ directional jets and one flow-adjustable Ultrassage™ back jet. End drain baths are also equipped with two flow-adjustable foot jets. Select models such as the ES553, LC635, LD635, LS640, LX553, LX635, and the PS5735 are available with Back-Stack™ jet technology.

The Jason directional therapy jets can be directed toward specific areas of the body and the flow adjusted for your comfort by rotating the nozzle.

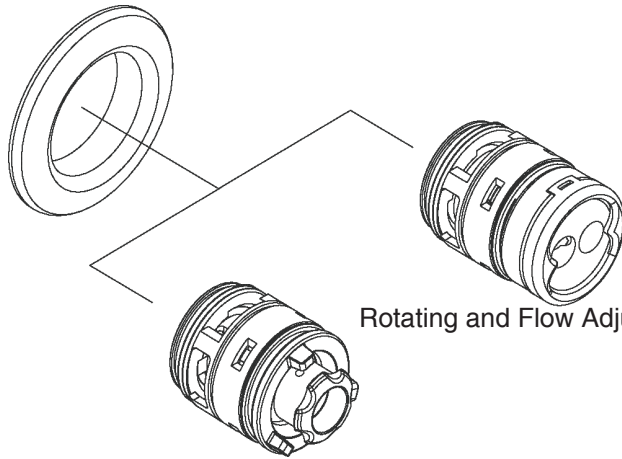

Each Jason Designer bath is equipped standard with one Ultrassage™ back jet that provides a gentle rotating back massage and is flow-adjustable by simply rotating the nozzle. Additional Ultrassage™ jet cartridges can be purchased to replace any standard directional jet if desired.

The directional and Ultrassage™ jet cartridges are interchangeable and may be easily removed by the user for cleaning or replacement. (See the drawing on page T.18)

All Designer end drain baths are equipped with flow adjustable foot jets. These jets are positioned to provide therapy to the bottom of the foot and are not directionally adjustable.

Back-Stack™ jets are standard on seven Designer baths and are perfectly positioned for a deep and relaxing back hydromassage. They are flow adjustable but directionally fixed. The PS5735 has one set and the LC635, LD635 and LS640 have two sets (one on each end) of four Back-Stack™ jets. The ES553, LX553 and LX635 both feature one set of six Back-Stack™ jets.

The Directional and Ultrassage™ jets are available in Classic White, Natural Bone, Bisquite, and Clear. The foot jets are available in Classic White, Natural Bone, Bisquite, Sand, Quicksilver, Black, and metal. The Back-Stack™ jets are available in Classic White, Natural Bone, Bisquite, and metal.

Rotating and Flow Adjustable Ultrassage™ Back Jet.
