

Home Spa Hydrotherapy Zones

Jason's Home Spas provide the choice of: Soaking, AirMasseur®, Whirlpool or Combination Air-Whirlpool Hydrotherapy. They also come standard with our Aromatherapy Infuser System, Chomotherapy Mood Lights, and Sound Immersion System.

In addition, all Jason's Home Spas include two whirlpool therapy zones specifically designed to provide relief of shoulder muscle tightness caused by stress, and back muscle soreness due to excessive physical exertion. The flow intensity of all whirlpool

jets included in the therapy zones for both the Trapezius and the Latissimus Dorsi muscles can be adjusted to fit the bather's hydrotherapy preference.

A rotating, flow adjustable, lower back Lumbar Paraspinal Jet and a Jetted Neck Pillow are provided with both zones to further enhance the hydrotherapy experience. The Jetted Neck Pillows can be operated either alone or in conjunction with the zoned jets or not used.

Jason's Jetted Neck Pillow massages the neck muscles.

Our Trapezius Therapy Zone jets are placed to provide deep tissue massage of the shoulder and mid to upper level back region thus relieving muscle tightness brought on by stress. At the same time, the rotating, flow-adjustable Lumbar Paraspinal Jet massages the muscles in the lower back.

Jason's Jetted Neck Pillow massages the neck muscles.

Our Latissimus Dorsi Therapy Zone jets work in conjunction with the rotating, flow-adjustable Lumbar Paraspinal Jet to provide deep tissue massage of soreness in the mid to lower back muscles typically caused by physical over-exertion.
