
Integrity™ Whirlpool Control

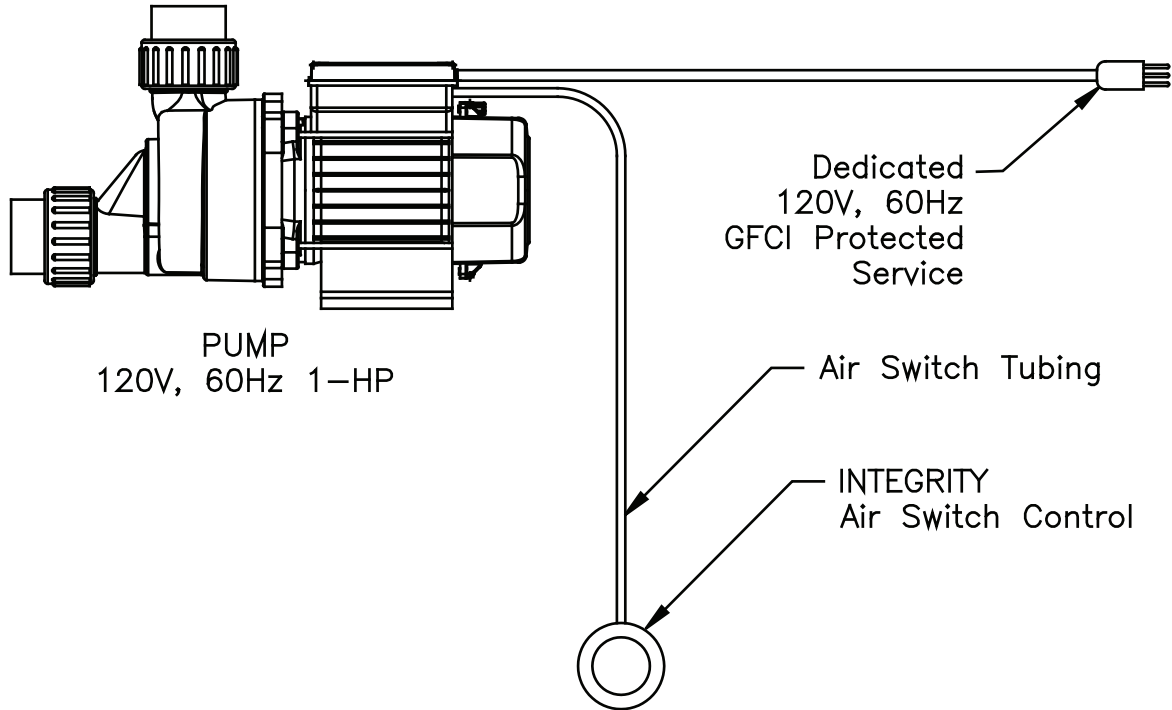

PUMP & CONTROL SYSTEM

Jason's Integrity™ Whirlpool system includes a quiet 1 HP, single speed pump motor, and a bather-friendly air switch activated control button.

PUMP ON / OFF WHIRLPOOL CONTROL

All Jason Integrity™ Whirlpool baths are provided with an air switch conveniently located for the bather operation. This air switch controls the pump On/Off functions. To start and stop the whirlpool pump, simply momentarily press and release the air switch button.

STANDARD FEATURES

- The Jason Integrity™ Whirlpool operation is controlled by an air switch placed for easy use by the bather. This switch controls the On/Off functions of the whirlpool pump motor.
- The air switch activated pump motor is designed to plug into a dedicated GFCI protected circuit for easy installation and maintenance.
