
Overflow Drain Fill Spout Assembly

This sleek, low-profile, minimalist design is perfect for our forma™ collection baths and available for all Jason Hydrotherapy baths.

- Available in Polished Chrome and Brushed Nickel finishes.
- Fast fill rate of 14 gallons per minute (flow rate dependent on line pressure, valves, and system set-up.)
- Broader application range. Models fit 17" – 22" baths with walls ranging from .06 to .75 inches thick.
- Built-in back flow preventer. (Instructions included for remote vacuum breaker installation.)
- Series of screens "comb" water to create crystal pattern and keep flow from wandering.
- Proven cable-drive drainage system prevents clogs and facilitates quicker drain time with fewer problems.
- Mechanical components made from 304 stainless steel and brass for added durability and corrosion resistance.
- Maintenance-free encased cable actuates drain plug for easier operation.
- 304 stainless steel overflow head for added durability.
