INSTALLATION INSTRUCTIONS

Designer Faucet Set

INSTALLATION

To install the supply valve (faucet set):

- The supply valves are mounted in the mounting cups and secured by the two screws and star washers provided. (See Figure 1)
- Apply a 1/8" (3mm) bead of silicone under the lip of the cup, insert the assembled cup and valve assembly into the 1-1/2" (4cm) diameter hole, and secure with the 1-1/2" (4cm) clamp from the underside.

- Place the foam gasket over the cup and valve assembly, secure the knob to the valve stem with the stem screw provided and press the cap into place.

NOTE: DO NOT OVER-TIGHTEN STEM SCREW.
