## Quiet Design™ Engineering

Jason's **innovative** Quiet Design™ Engineering, which dramatically reduces noise and vibration levels, is now standard on all Jason Whirlpool, AirMasseur®, and Air-Whirlpool Baths. This revolutionary bath construction includes the following features which, when combined, make up our Quiet Design™ Engineering system.

---

### ALL BATHS

#### JASON LEVEL-FORM™ BATH BASE

- Jason's Level-Form™ base absorbs vibration and noise.
- Provides a rigid pre-leveled, full support, high density platform for ease and accuracy of installation.
- Prevents heat loss through subfloor.
- No mortar bed is required under the bath if installed on a firm, level surface.

#### SEPARATE BASES FOR BATH EQUIPMENT

Separate mounting bases for bath and whirlpool pump and/or air blower reduces vibration and noise transmitted to the bath.

### AIRMASSEUR® BATHS

#### BLOWER

Jason air blowers are designed for quiet operation and can be remotely located up to 15 feet from the bath for increased sound reduction.

#### AIR JETS

All AirMasseur® baths are provided with a number of strategically located air jet holes for uniform and quiet operation.

### WHIRLPOOL BATHS

#### PUMPS

For the quietest operation, Jason only uses long life, quiet, inductive type motors. Standard Edition Designer Whirlpools employ 1-1/2 HP, 1 speed pumps and Signature Edition models are equipped with 1-1/2 HP, 3 speed pumps for super quiet operation and additional therapy control. Integrity whirlpools are equipped with a 1HP, 1-speed pump.

#### NEW THERAPY JETS AND PLUMBING

- The Designer Whirlpool plumbing lines from the pump to the jets have been increased in size to 1-1/4" for reduced water noise and changed to flexible PVC hose to reduce vibration.
- Jason jets were designed for reduced hydraulic noise and to be flow and directionally adjustable by the bather.
- Jason's Designer whirlpool silent air controls draw in air from the underside of the bath, eliminating noise created by air induction.

### AIR-WHIRLPOOL BATHS

#### GENERAL

All Jason Air-Whirlpool baths are equipped with the quietest equipment available including Level-Form™ Base design, quiet air blower, quiet therapy jets, plumbing, etc.
